NiteMax *Ultra*

Digital Night Vision Viewer

The NiteMax Ultra is a state-of-the-art Digital Night Vision Viewing System. Utilizing advanced solid-state circuitry, the NiteMax Ultra provides Day & Night operation in any lighting condition without failure.

The NiteMax Ultra uses the latest in image pick-up and image processing to digitally produce a bright and clear picture in the darkest environment. The high resolution digital picture is displayed on a standard 2.5" LCD screen. The NiteMax Ultra also features a (RCA) video output jack for easy recording or transmitting of the NiteMax's digital night vision images. System power is achieved with the included rechargeable camcorder battery or via the auxiliary AC/DC power port.
